

**Event Name:** Echoes of Light

**Date:** 1st October 2025

**Venue:** Meghnad Seminar Hall

## Event Details

The primary objective of the "Echoes of Light" event was to foster academic curiosity and creative expression within the fields of Optics and Photonics. The event featured two main competitive activities:

- **Quiz Competition:** Participants were tested on questions related to optics. A unique highlight of this quiz was that the winning participant was appointed as the third judge for the subsequent event (Extempore).
- **Extempore Competition:** This activity evaluated the participants' critical thinking and communication skills. Each contestant was provided with a topic on the spot, upon which they had to present their views.

The event aimed to bridge technical concepts with creative ideas, aligning with the thematic goal: "when sound resonates and light illuminates".
